

MCFC - General Update

October 4, 2024

Harvesting:

RV Pepper is harvesting on block 76 up the Minnow. There is about 6ha left to harvest. Harvesting/hauling as weather allows.

Warren McLennan is harvesting block MC02. There is about 8ha left to harvest. Harvesting/hauling as weather allows.

Working on winter harvest plan and winter tender.

Roads:

ORM has completed the Killam Creek Road upgrade. Planned to move to Spinner Road connector as weather allows. Roughly 1km of road to upgrade.

Will work on winter roads tender when harvest plan is finalized.

Bridges: Quiet

Planning/Other:

ORM and RT King are gathering information on blocks planned for winter 2024/25 harvest. SP data, riparian and general look around to see if we missed anything.

Working on Site Plan amendments from older blocks that are not accurate to what is in field. Roughly 95% of MCF blocks require a SP amendment.

Sort Yard:

BKB is hauling wood out of MFI yard as per agreement.

Carrier is hauling in and out of yard as weather allows.

MOF completed an inspection on MFI yard. All good.

Silviculture:

Clausen and Integrity Contracting are preworked for FG/Stocking surveys. Lots to do.

Walking overdue FG blocks to make plans.

Ordering 100,000 summer trees for 2025 planting season.

170,000 spring trees plus excess ready for 2025.

Recreation:

We are maintaining both LaSalle Lake and Beaver campgrounds.

We are maintaining McBride Peak halfway.

New proposed Lucille trail is now being referred to the Village and then Recreation.

Highways dumped 30+ loads of RAP (highway waste material) at the top of Lasalle Lake road. Plan to use it to fix road 2025.
