

MCFC - General Update

August 10, 2026

Harvesting:

Warren McLennan is harvesting on block MC07. Block is cedar leading with spruce, hemlock and balsam.

RV Pepper should be hauling winter decked wood from CL08 by the end of the week.

Summer 2026 logs sold to the following: SPF to Carrier, Cedar post and rail to BKB and Cedar3, Hemlock sawlog to VIP and pulp to West Faser.

Roads:

ORM upgraded Upper Clyde ML.

ORM finished construction of the Powerline Road (2km).

ORM working on graveling 400 road.

Schapansky is building a 600m spur into MC09 located up the Spinner.

Bridges:

Quiet

Planning/Other:

RT King is laying out blocks in the Bell and Mountainview areas.

ORM is collecting SP data, riparian information and a general review of layout.

ORM is laying out new roads to avoid fish creeks and bridges.

Layout and harvest priorities have changed since the announcement of the Canfor Pulp mill closing.

Dore River Consulting has completed waste assessments and fire hazard assessments for the year.

Silviculture:

Clausen Contracting is working on silviculture surveys this summer/fall.

Integrity has started a brushing program for this year, estimated at 100ha.

Recreation:

Rec site maintenance ongoing.

Specialized Forest Management is actively working on the MCF Lucille trail construction, 95% complete.

RV Pepper has bunched out roads, parking lot and trails up McBride Peak. This work allows the Bike Club to become active again. The club has been inactive since the forest fire due to the large amount of Danger trees.
